NOTE: The standard edition (free version) of MalwareBytes offer great scanning capability for many types of threats that antivirus applications currently do not pick up in their scans. For automatic updating and scheduled scanning using MalwareBytes, consider the paid version of the program..

- To download MalwareByetes, open a web browser and go to <http://download.cnet.com/windows/>.
- Type 'malwarebytes' in the search bar, then hit the ENTER on your keyboard.

- Scroll down to the 2nd entry in the results to find MalwareBytes.
- Click the 'Download Now' button to the right of the MalwareBytes.

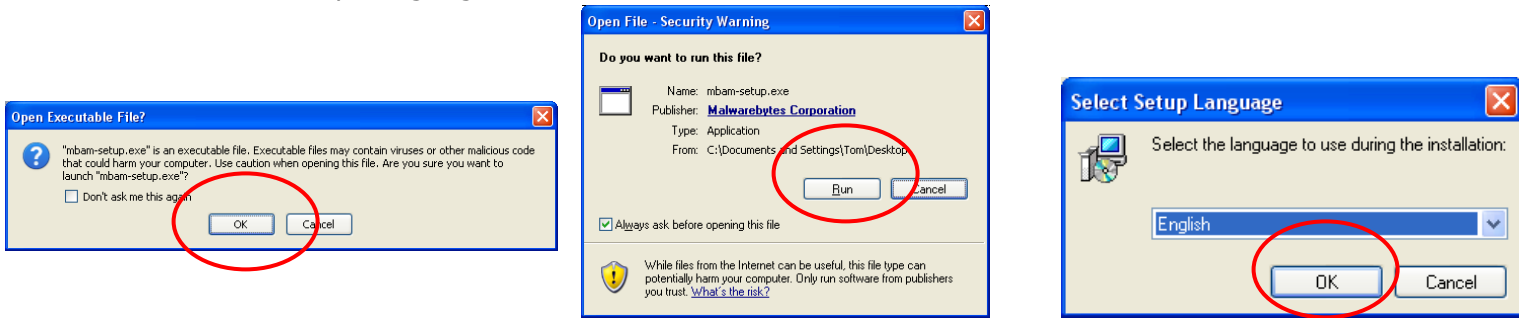

- If you are using Firefox as a browser select to 'SAVE' the file and place it on your desktop. Then run it by double-clicking directly in the Downloads area that appears once the download completes.
- If you are using Internet Explorer, a file download warning may appear. Choose to download the file and to 'Run' it directly from the download instead of saving it to the desktop.

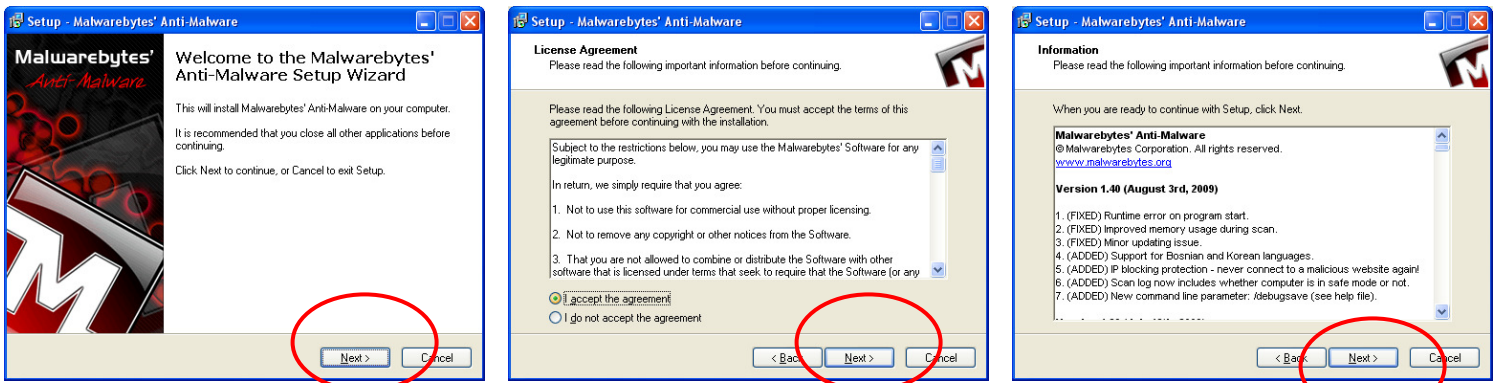

Help with this installation, and other computer or networking issues, is available by contacting Tom's Computer Service/Grundig Consulting. Standard service charges may apply.
